

ENVIRONMENT, HEALTH & SAFETY (EH&S POLICY)

We commit ourselves to conduct our business in a manner that conserves the environment and minimizes the occupational hazards & risks in our business activities. It is our mission to be recognized by our employees, customers and community, as a responsible business establishment committed to continual improvement to prevent negative Environmental, Health and Safety impacts from our business activities. We are committed to proactively comply with statutory, regulatory, legal and other requirements related to environmental protection and occupational health & Safety.

To achieve this, we shall: -

- Comply with applicable Environment, Health & Safety legislations.
- Implement administrative and engineering controls to minimise process waste generation, process emission and disposal of the waste in environment friendly ways.
- Continue monitoring of Air Emission, Noise Emission, Waste Discharge, and to make efforts to minimise the air, land and noise pollution to the extent possible.
- Establish, review and strengthen our Environment, Occupational Health & safety Management System as a shared responsibility with involvement of all levels in the organisation.
- Implement safe operational control procedure and follow safe practices at all levels;
- Institutionalize culture of natural resource conservation and pollution prevention;
- Provide awareness & training to all employees to ensure good environmental health and safety performance;
- It will be our endeavour to prevent accidents and injuries and work as a team to achieve the objective of NO INJURY & ILL HEALTH;
- Educate our associates including our employees, suppliers and customers to develop awareness, promote and implement the actions that ensure good environmental health and safety performance;
